

CONTROLLER + SHARED RESEARCH STATE

recorded outcomes inform the next hypothesis

1 Hypothesis

testable change
expected effect

2 Implementation

editable source only
diff + content hash

4 Keep / discard

native score gates
retain or roll back

5 Memory / transfer

artifact + lineage
retained / failed

candidate source

LOCAL TASK EXECUTION

Local data

responses / labels

3 Local verification

checks + fixed scorer

trusted evaluator; task data remain outside model messages

Schema-limited evidence

scores / diagnostics
no raw matrices

Cell clients are simulated. DTI I/O isolation is a separate execution boundary.

Locality and bounded messages are not a formal privacy guarantee.
