

BioCoLoop: Collaborative Evidence-Guided Research Framework

OUTER RESEARCH LOOP

Fixed research language model $\mathcal{S}$

INNER COLLABORATIVE TRAINING

OUTPUTS

Task-specific fitted models

Reusable computational solutions

Designs

Programs

Policies

BIOLOGICAL VALIDATION SETTINGS

Drug–target interaction

Input: compound+protein seq
Output: interaction probability

Proteomic efficacy

Input: proteome profile + drug
Output: drug efficacy

Cell perturbations

Input: expression response profile
Output: perturbation identity
